The temperary contract for transportation of the Australian, British and American Mails between San Francisco and Australia and New Zealand, commences this month. The nut-point mail contracts the month of the season her cavaliers servente left Monace with a clear profit of \$10,000.—Glisson with a clear profit of \$10,000.—Glisson mail contracts this month. dense the Australian, British and American Malis between San Francisco and Australia and New Zealand, commences this month. The out-going mail is being detained in San Francisco for six days beyond the time agreed by the former contract which expires the 13th of December next, to afford the contractors as apportunity of timing the arrival and departure of the mails in future so as to employ but these vessels instead of four as heretofore. The sceamers to run in this service will be the Zealandia, Australia and City of Sydney. The City of New York as transferred to the Fanama route, and the detentions in Sydney will be limited to 13 days instead of six weeks as previously. We are glad to learn that the speed will be immediately. These favorite vessels, which have afforded, the traveling public so much satisfaction during the long period of 8 years, which the contract has been in existence, are fully squal to the requirements of the age, and by a triffing additional expenditure in the way of coals, will, we have little doubt, furnish records that will be pleasing to the public press to notice. The renewed contract naw entered into for a period of twelve months, was wisely accepted, for it affords our congress an opportunity of recognizing the right of the colonias to the co-operation of the American people in maintaining the service. For eight years it has been substituted as second Ramavalona, however, a change the American people in maintaining the service which seems and new X-zealand, next intakanding the fact that Senator Chandler, in the year 1872, when he spoke as the of the representatives of the Covernment of this country, gave a solumn pleador in his place in the Senate "that substitute of the abolition of slavery as far as the Musamapind on the first land of the contraction of the remember of slavery as far as the Musamapind and the detail of solutions of slavery as far as the Musamapind of an abolition of slavery as far as the Musamapind of the contract transfer of the remember of the abolition of sla will render memorable the reign of Ramavable spoke as one of the representatives of the Government of this country, give a solumn pladge in his place in the Seoate "that substantial aid should be given when efficient vessions were placed on the line, instead of the old warn out side whosevers then used by Webb." A reference to Senatur Chandler's speech on that occasion will demonstrate the fact that such vessels as the Zealandia, Australia and City of Springy are of the tonnage and power pointed out by him as necessary for the service. Practical experience shows the wisdish and investigate of the Senator in the remarks then made by time, and the admirable and officent manner in which the contract has been mannamed clearly accounts for the popularity of the San Francisco main over all others from the Australian Colonies. Instead of co-operating with the Colonies, however, Americans have been a drug claim upon the undertaking by leving toll for the transportation of units across the Continent of American and computating with the English Government to the popularity across the Continent of American and computating with the English Government to the popularity of the San Francisco main upon the undertaking by leving toll for the transportation of units across the Continent of American and computating with the English Government to the popularity of the San Francisco main upon the undertaking by leving toll for the transportation of units across the Continent of American and computating with the English Government to the popularity of the San Francisco main upon the undertaking by leving toll for the contract has produced and the former backets and the colonials and the computation of the stansportation of treating were adopted by the Queen's surface to his solution, and the Europea and power popularity of the San Francisco main upon the undertaking the service of the Colonials for the popularity of the San Francisco main upon the undertaking the serving the former backets and the former backets and the former backe nies had arrived to represent their interests at the seak of Government during the coming sea-sion, but in the event of their non-arrival, we do hope that Mr. Creighton will be commis-sioned to go there and complete the good work he has a semirably imaginated. Meantime considerable progress can be made in San Francisco towards carrying out the object in view. The Board of Teale at its last annual meeting reterred in the report of its President, Jacob S. Tabor, to the importance of maintain-ing postal communication with the colonies of Australia. Not only Mr. Taber but Gaptain Merry and other members spoke so forcibly on the subject that a resolution embodying their views was unanimously adopted. New, how-ever, is the time for active measures, and we addently direct the attention of the Board of Trade to the importance of the subject, in the hope that our suggestion will meet with a bearty approval. Our conviction is that the Board of Trade should convene a special meeting at once and pass such resolutions confirmatory of their previously expressed spinions atory of their previously expressed spinions as will have influence upon Congress: that these resolutions be forwarded to the Sanators and Members of the Assembly for the Pacific

Caust, with a request that the united influence and advacacy of our Representatives and Del-egates be secured in furtherance of the follow-1-A remission of charges for transportation

of mails across the continuot.

2-To obtain an allowance for carriage of American and American mails out of the fand intended to be placed at the disposal of the Postmaster General.

3—To reduce the time for transport of the tastralian mule from San Francisco to New York to five days.

York to five days.

If Congress would accode to the terms of such a petition, the New Zealand and possibly the New South Wales mail line would be placed on a firm and sound footing.—S. F. Merchant.

Gambling Exploits of a Princess.

Within a day or two, says a Paris letter,

society has been considerably interested over \$ he reappearance of the Princess Souwaroff, This handsome Russian lady was during many seasons the reigning star at Nice and Momany, and was not the less remarkable on account of her frequent attempts to break the bank. She has not been sent at either of those places or in Paris since 1878. She lived so fast here and gambled so heavy at Moota Carlo that the lass Crar forbade her to leave the Euroire till. late Czar fortude her to leave the Empire till she repaired her fortunes. Whether she has done so or not is more than one can tell, but done so or not is more than one can fell, but she is certainly back in Paris, where she has already rented a magnificent house, in which she is going to have some fun before the winter is over. The Princess whose mailen name was Rasiewska, was enormously wealthy when she married the Prince Son warrell, whose fortune was very moderate. After a few years of matrices they arrest to fine years of matrices they arrest to fine years of matrimony they agreed to disagree, and an amicable separation took place. The Prince devoted himself to fravelling and the Princess went to Monaco in search of excitement. She played with large stakes, and her boblosse, her couloess, and her alternate beary losses and winnings were the sensation of Moute Carlo, Every evening, when the gambling-room closed she entertained a large party of guests a supper in her wills on the Promensale des Angiais. Some rather rary anerdeles are related about her, and her many decidedly eccentric associates gave her a somewhat scandalous reputation. One of these tales is that after one of her suppers the Princess, taking off her slipper threw it across the room, wheseupon an actress of the Palais Royal Theater, who was among her guests, picked it up, filled it with champagne wine, emption it at a draught to the health of the hosters. This so pleased the Princess that she exclaimed, as she conthe Princess that she exclaimed, as she em-lorated the actress. "To morrow, my dear, you shall have a will of your own, next door to mine." This promise was kept, and the ac-tress has now the slipper under a glass case. A very stylish young man, who got cleaned out at trade-el-quarante at Monaco, amused himself one evening by marking game for the rich Rassian lady, who being pleased with his appearance accepted his services, although he was a stranger. That day the was a heavy winner, and when she left the lable offered this gentleman a transact frame note in so this gentleman a trousand franc note in a delicate a manner that a refusal was impossi-
